

VIGHNESHWARA C

DATA ENGINEER

📞 9483020518 ✉ vighneshbhatchanila@gmail.com [in linkedin.com/in/vighc](https://www.linkedin.com/in/vighc) [e vighc.github.io](https://github.com/vighc)

Summary

Data Engineer with 5+ years of experience designing, building, and optimizing large-scale data pipelines on Google Cloud Platform (GCP) and AWS. Proficient in Python, SQL, Apache Spark, BigQuery, and Airflow, with hands-on expertise in scalable ETL development, real-time data processing, and enterprise cloud migrations. Proven record of processing multi-petabyte datasets with 99.9% availability, automating 500+ ingestion workflows, and reducing pipeline runtimes by 30%. GCP 3x Certified (Professional Data Engineer, Professional Database Engineer, Associate Cloud Engineer) with demonstrated leadership mentoring junior engineers in fast-paced enterprise environments.

Experience

ALBERTSONS COMPANIES, INC.

Oct 2025 – Present

Advanced Engineer Data

Bengaluru, India

- Built an enterprise-scale Merchandising Data Mesh unifying 360-degree merchandising data at Store–Product–Day grain, establishing a single source of truth for inventory movement, sales, and operational performance across the organization.
- Integrated and allocated labor costs, warehouse expenses, transportation costs, operational overhead, invoice gains, and shrink (inventory loss) into the data mesh, enabling accurate product-level profitability and pricing analysis.
- Developed derived business metrics and profitability models combining merchandising and operational cost data, delivering improved margin visibility and enabling data-driven pricing decisions for stakeholders.
- Contributed to Aisle Maze, an AI-powered in-store navigation solution that identifies exact product locations within stores, reducing customer search time and enhancing the shopping experience.
- Enabled AI-driven product discovery and recommendation capabilities by integrating store layout, product, and inventory data, improving customer engagement and supporting personalized shopping recommendations.

RISKONNECT INC.

Nov 2023 – Sep 2025

Data Engineer

Bengaluru, India

- Designed and optimized scalable data pipelines on GCP (BigQuery, Dataproc, Pub/Sub, GCS), enabling multi-petabyte processing with 99.9% availability for enterprise reporting.
- Automated 500+ monthly ingestion workflows using Airflow, Python, and Cloud Functions, reducing manual intervention by 40% and enhancing operational efficiency.
- Built Spark-based ETL pipelines processing 10+ TB per day, integrating data quality checks, lineage tracking, and governance controls to ensure audit compliance.
- Implemented CI/CD pipelines (GitLab + Airflow) for data workflows, reducing deployment errors by 30% and aligning delivery with DevOps best practices.
- Enabled real-time Salesforce synchronization and monitoring systems, powering Looker and Tableau analytics dashboards for 100+ stakeholders and improving SLA compliance to 99.5%.
- Mentored 2 junior data engineers, guiding project deliverables and assigning tasks aligned with individual strengths and growth areas.

TATA CONSULTANCY SERVICES (TCS)

Aug 2021 – Nov 2023

Data Engineer

Bengaluru, India

- Developed and optimized ETL pipelines using PySpark, Dataproc, and Pub/Sub to process multi-petabyte datasets, reducing runtimes by 30% for British Telecom.
- Migrated large-scale data from Oracle to GCP, cutting infrastructure costs by 20% and improving query performance for AI solution trials.
- Streamlined BigQuery transformations and implemented data quality validation frameworks, ensuring 99% reporting accuracy and enabling business-critical KPIs.
- Built fault-tolerant pipelines with proactive monitoring and automated error handling, reducing incident resolution time by 35% and improving system reliability.
- Collaborated with cross-functional teams on data modeling and schema design (OLAP/OLTP), enhancing scalability and analytics performance across domains.

Technical Skills

Languages and DataBases: Python, SQL, BigQuery, Bigtable (HBase), PLSQL, Snowflake

Cloud: Google Cloud Platform (GCP) - 3x Certified, Amazon Web Services (AWS)

BigData Technologies: Apache Spark, kafka/PubSub, DataProc (Hadoop), Athena (Hive), Airflow

Core Competencies

ETL Pipeline Development | Real-Time Data Processing | Cloud Data Migration | Data Quality and Governance | Data Modeling (OLAP/OLTP) | CI/CD for Data Workflows | Workflow Automation | Data Mesh Architecture | Profitability and Business Metrics Modeling | Stakeholder Enablement | Team Leadership and Mentoring

Research & Certifications

- Research Paper: Contributed to the field of robot motion control with a paper on Robot Motion Control OpenPose.
- Google Cloud Certified – Professional Data Engineer
- Google Cloud Certified – Professional Database Engineer
- Google Cloud Certified – Associate Cloud Engineer

Awards & Achievements

- ACI Recognition: Recognized for the timely delivery of Data Mesh metrics, including Labour and Warehouse Cost.
- RK Spotlight Award: Awarded for successfully delivering an ETL solution from POC to production on schedule.
- Employee of the Month: Received multiple Employee of the Month awards at TCS for innovative solutions and critical problem-solving.

Leadership & Mentoring Experience

- Team Leadership: Directly manage and mentor 2 associate data engineers at Riskconnect, guiding them through project deliverables and assigning tasks aligned with their strengths and growth areas.
- Designer Head: Led a team of over 100 students in the Design club, fostering creativity and collaboration.

Education

Mangalore Institute of Technology and Engineering (MITE)

Bachelor of Engineering (BE) in Mechatronics

Aug 2017 – July 2021

Mangalore, Karnataka
